Introduction

Yodo1 is a game publisher based in China. Founded by a group of technology and business veterans, Yodo1 devoted herself in growing western tech companies in Asia, reaching millions of users. Yodo1 is a team that knows how to work with western companies to adapt their business of success in the changing China market.

Partners of Yodo1

The Challenge

1. On-demand Provisioning

Due to the unique business structure, Yodo1 needed to provision machines, with different specification, on the spur of the moment. Yodo1 wanted a cloud provider who has the ability to immediately provision instances when needed.

2. Network Speed

High latency can impair experience of game users and break the trust built by Yodo1 as one of the leading game publishers in China. Yodo1 needed a reliable cloud provider inside China to ensure its end users never experience connectivity speed and capacity reduction caused by the Great Firewall.

3. Cost Effective Cloud Solution

While meeting demand and maintaining reliability was vital, Yodo1 also wanted to reduce her IT and infrastructure costs. Yodo1 also appreciated cloud providers who can offer high levels of support for free.

4. Responsive Service

Support is a very key to accessing any cloud offering. Yodo1 would like a professional and easy-to-reach support team to answer their questions or offer a helping hand when there were any issues.

The Solution

1. Effortless and Instantaneous Provisioning

Fengqi.Asia has a dedicated hotline for Yodo1 to request new machines. With just a phone call or a few clicks via our portal, Yodo1 can provision a new machine, despite its specifications and requirements, within three minutes. It enables Yodo1 to continue its business development in a barrier-free environment.

2. High Network Speed

Yodo1 has been flat-out impressed with Fengqi.Asia's network speed. Fengqi.Asia has connected three BGP networks in China, including China Telecom, China Unicom, China Mobile and CNC. These wide coverage BGP networks provide a high speed and low latency for customers of Yodo1.

3. Ongoing cost savings

The cost of provisioning a server is usually just the tip of the iceberg. Fengqi.Asia cloud package includes not only computing power, but also fixed bandwidth and support. With just one standard price, Yodo1 was able to reduce its ongoing cost significantly. This means Yodo1 can allocate more resources in other areas that improve the overall user experience.

4. Knowledgeable and Collaborative Support

Fengqi.Asia has responsive support teams in Hong Kong, Beijing and Shanghai which troubleshoot any issues for Yodo1 at her fingertips. Yodo1 continually benefits from Fengqi.Asia's up-to-date knowledge and involvement in cutting-edge technology.
